

Gait Analysis

Is your horse 'not quite right' in his way of going but you can't put your finger on it?

The Equinosis Lameness Locator® uses sensors to pick up subtle signs of lameness that may be undetectable to the human eye.

Gait analysis is ideal for horses:

- With poor performance or behavioural issues
- With mild or subclinical lameness
- With apparent multiple limb lameness
- With apparent compensatory lameness.

Gait analysis sessions £50 per horse.
